BOGOLF SIMULATORS.

We are *PIONEER* Developer for *INDOOR & OUTDOOR* Golf Simulator Application.

High Speed Camera

HD 3D Graphics

Hardware

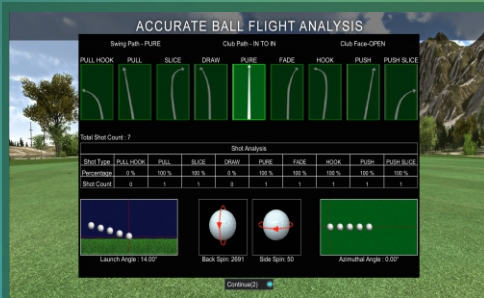

Multi Projection

BOGOLF - our indoor 3D golf simulator gives the opportunity of solo golfing as well as group golfing. Our technology ranges from basic to most advance which can be installed to learn & enjoy golfing at home, to attract crowd on events & exhibitions, to increase & generate revenue in a sport club & self owned indoor golf center.

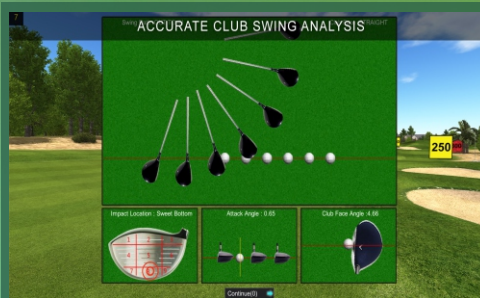

Software Features

9 Ball flight

A golfer needs to control the club face, club head in order to hit the pure shot. Our 9 swing path analyzer tool will guide you on which shot you have hit. It will also show you the Ball spin & Launch angle.

Club Swing Analysis

Swing path is the path on which club moves while taking backswing & downswing. This path indicates ball flying direction - the initial & the final destination of ball. Analyzing the swing path is the tough task. This is the reason 9 Swing path analysis tool has been added to our simulator.

Video Analyzer

Players video can be uploaded, and then dissected to see the different frames of the shot. This allows for players to check how their pose is at different frames and make corrections where necessary.

Other Features

- * Putting & Chipping Practice
- * Player Customization
- * Network Play
- * Weather & Wind Control
- * Score & Leader Board
- * Accurate Ball Physics
- * Accurate Slide & Back Spin
- * Stereoscopic 3D Supports
- * Global & Local Course Selection
- * Practice and Challenge Play
- * Single & Multi Player
- * Mulligan Selection
- * Online Chatting During Play.

The CosmosClub Academy For Golf

More than a Club.

Practice. Play. Train.

The perfect combination of fun
and professional golf training
academy with a IGU certified coach.
